Based on the range of standard WINDBOX series and incorporating the contemporary elegance and rounded shapes of DECO air curtains, it comes the next generation, SMART air curtain. This new model integrates the latest technical innovations in the market on a single unit with an adaptive design to any decorative environment, maintaining the efficiency of WINDBOX air curtains.

Combining the properties of steel and rounded shapes of its injected plastic side covers, the SMART air curtain presents a high quality design and finishes, and emerges as a perfect model straddling the standard and decorative ranges.

Thanks to its top inlet, the rounded front panel provides a clean and modern vision of the air curtain, hiding its inlet grille which acts as a filter. Thus, its front panel is available for any customization required by the customer: Logotypes, signage, etc.

In addition, the curtain incorporates a double security opening system for its service door and front panel for convenient maintenance and service.

With self-supporting steel frame panels, finished in epoxy-polyester paint white RAL 9016 as standard.
SMART Air curtain
New standard decorative generation

- Hidden top air entrance
- Smooth or customizable front panel with logotypes, lighting or signage
- Self-supporting steel rounded casing with edgeless plastic side covers
SMART | Water heated: connection pipes P86 and P64 are 2x3/4" female, P54 2x1" male. P86 2 rows coil, P64 3 rows coil, P54 4 rows coil.

For Commercial And Industrial Doors

Decorative High Pressure Air Curtains

- Stylish, discreet and contemporary design adaptable to any interior architecture.
- Smooth front panel can be customized with logotypes, lighting, lettering or safety informative signals, according to the client requirements.
- Self-supporting steel rounded casing with edgeless plastic side covers, finished in structural epoxy-polyester painting white colour RAL9016 as standard. Other colours are available on request.
- Hidden top air entrance, avoiding the inside view of the unit and the inlet grille.
- Anodized aluminum outlet vanes, airfoil shaped, adjustable from 0 to 15º each side.
- Double-inlet centrifugal fans driven by an external rotor and motor and low noise level, 5-speed selector. “EC” models assembled with very low consumption efficiency fans.
- “P” type with water heated coil. “E” type with electrical shielded elements, three stages with integrated regulation. “A” type without heating, air only. Optional “DX” with direct expansion coil.
- Includes Plug&Play control with 7m RJ45 cable and infrared remote control. Optional: Clever control (programmable, automatic, intelligent, energy saving, Modbus RTU for BMS...).
Smooth or customizable front panel with logos, lighting or signage

Our air curtains range

The new and attractive Airtècnics air curtains are the ideal solution to control the indoor climate in commercial or industrial premises that need to keep their doors open.

Air curtains create an invisible barrier that efficiently divides the internal atmosphere from the external one. They substantially reduce energy losses through the door, up to 80%, while increasing employees and clients comfort.

For commercial premises, Airtècnics air curtains allow a clear view of the inside, welcoming the client to come in freely. The result is more customers and increase in sales. Moreover, they contribute to create a comfortable atmosphere at the entrances and indoor area, protect from cold and heat, repel insects and avoid dust, fumes and pollution entering the building.

The selection of the appropriate device is very important to obtain these advantages. Factors such as interior drops, strong winds, the door’s location, several communicated floors and/or opposite doors and the height of the installation, among others, have to be taken into consideration at the time of choice.

Since year 1993, Airtècnics is fully integrated in the Rosenberg group, an organization specialised in the design, manufacture and distribution of ventilation equipments, air-conditioning and its components, with production plants, subsidiary companies and partners in more than 50 countries.
Control & regulation

The control over air curtains is essential to avoid spending more energy than necessary. Our latest generation controller CLEVER, allows the automatic control of the air curtains performance in each situation, maintaining the comfort with the maximum energy saving.

- Proactive and intelligent regulation
- Many advanced functions and programmes
- Maximum energy savings
- Friendly interface design
- “Plug & Play” installation
- BMS connection

Accesories

Temperature sensors, door contact, ambient thermostat, anti-freeze sensor, thermostatic valve and Modbus TCP Ethernet.

Airtècnics, as air curtains specialist, can produce units with special requirements under request. We present some of the possibilities:

- External alarm signals: unit working, heating ON, airflow switch, dirty grille, electronic overheating signal, fans overheating thermo contact TK, electrical heating blocked, etc.
- Water or steam coils for higher temperatures or different power than standard
- Special heating elements at desired power and power supply
- Dummies (empty air curtains) to combine with working units
- Industrial air curtains with ATEX fans

Please consult us for further information or other options.
