COMPACT FLY is the most compact model from the insect control air curtains range. It has been specially designed to prevent flying insects from entering drive-thru windows, food shops, toll booths or kiosks.

Double-inlet centrifugal fans driven by an external rotor motor and low noise level. Large faceted inlet grille avoiding intensive maintenance. It incorporates two stages of ventilation: Comfort Mode, with a softer jet, and Insect Mode, with a more powerful jet.

Included regulation with infrared remote control and inbuilt keypad with leds.
