

### Characteristics

Compact sized axial fans used in electronics applications and for cooling small device components, three models are available in three speeds: high, medium and low.

- Low noise level
- Certifies UL, CSA, VDE
- High, medium and low speed versions
- Other voltages by purchase
- Some models require a minimum quantity purchasing order
- RAH Models to 230V AC
- Aluminium frame
- High impact resistance plastic blades, except the RAH 1238B1-M model, with metallic blades
- Ball bearings (B) or friction bearings (S)
- RDH Models to 12V DC (optionally 5V DC, 24V DC or 48V DC)
- Frame and blades of high resistance to impacts made of plastic
- Standard ball bearings. Friction ones on request
